

VENTZON

Digital Loyalty Rewards for Local Businesses

WHAT IS VENTZON?

Ventzon is a digital loyalty program built for local businesses. We replace paper punch cards with a simple, modern system -- no app download required for customers, and no hardware needed for you.

Customers check in by scanning a QR code and entering their email. You get a live dashboard with real customer data. They get rewarded for coming back. Everyone wins.

WHAT WE PROVIDE

For Your Business

- Your own branded loyalty program, live the same day
- A QR code for your counter, window, or receipts -- that's all the setup
- Real-time dashboard: see who's visiting, how often, and when
- Automated reward emails sent on your behalf when customers earn
- Full customer list with visit history
- No contracts. No hardware. No setup fees.

For Your Customers

- No app download required -- works with just an email address
 - A digital stamp card that never gets lost or left at home
 - An automatic email when they're one visit away from a reward
 - An automatic email when they've earned their reward, ready to redeem
 - A real reason to choose you over a competitor

HOW IT WORKS

The Customer Experience

Sarah visits your coffee shop for the first time. She scans the QR code on the counter and enters her email -- no app, no account creation.

Every visit, she gives her email at the register. At visit 7 of 8, she gets an email: "One more visit to

earn your free coffee at Brewed Awakenings." At visit 8: "You earned a reward. Show this at the register to redeem."

She comes back. She redeems. She comes back again.

The Business Experience

You sign up, enter your shop name, your deal (e.g. "Buy 8 coffees, get 1 free"), and the number of visits required. We generate your QR code -- print it or display it on screen.

Your staff enter customer emails at checkout, or customers scan themselves. The system tracks everything automatically.

Log into your dashboard anytime: total customers, check-ins today, who's close to a reward. No training required. No ongoing maintenance. It just runs.
